

Magnify your Brand Experience

- Giant Interactive Tablets
- Touchscreen Tables
- Smartphone Solutions

ATTRACT • ENGAGE • INFORM

Just like your regular mobile and tablet devices – but **100x bigger!**

The award-winning Giant iTab uses cutting-edge technology to leverage your digital content & present it in the popular smartphone and tablet style we all use every day – but on a Giant scale!

- The familiar Smartphone & Tablet 'Look & Feel' **attracts more attention** and, by removing any fear factor, encourages more users to interact with the device, especially in unattended areas.
- The intuitive software design is so easy to use that no training of staff or customers is required resulting in **far better engagement** of your digital content on screen, helping to get your message across more effectively.
- The ability to repurpose existing digital content makes it very quick and simple to set-up and the **perfect way to inform your customers** about your brand, products and services.

Our products are widely used in events, exhibitions, retail, broadcast, banking, gaming, corporate offices and e-commerce for showcasing Android and iOS Apps, websites, interactive maps, showguides, advertising, videos, pdf's, brochures, social media, schedules, surveys and any other digital content or presentations... the possibilities are endless.

Our impressive client list includes international brands and blue-chip companies as well SME's, agencies, event professionals and content developers. We work with businesses all over the world to help organisations significantly increase their sales and marketing message through improved customer interaction and engagement.

We have a global partner network designed to supply, service and support your needs in all parts of the world.

Available to RENT or BUY Worldwide

“

This intuitive technology is incredibly easy to use just like a giant iPhone or a giant iPad.

”

AV Magazine

Magnifying brand & mobile experiences for some of the world's biggest companies

Want to know more?

Please ask and we can quickly explain how these clients utilised the Giant iTab to maximise their brand message.

Five popular uses for Giant iTabs

1 EXHIBITIONS, CONFERENCES AND EVENTS

With an ever-growing demand for more interaction and engagement at Events, the Giant iTab offers the perfect solution to get your visitors and customers more involved and engaged with your brand by presenting all your mobile ready content and show guide information such as floor plans, exhibitor lists and seminar programmes or individual exhibitors presenting their latest product brochure, app release or strategic marketing activity to potential customers and partners.

2 APP/CONTENT DEVELOPMENT AND TESTING

Capable of running websites and Apps in their native format as either complete or partial build from Apk files, Giant iTabs can showcase websites and mobile apps perfectly exactly as the designers intended. With all the usual touch, swipe, pinch, gestures and functionality of your hand-held devices they are frequently used in tech, innovation and development labs for group testing, development and presentation as part of the app or content build process, transforming the single user device into a group experience.

3 BROADCASTS AND 'LIVE' PRESENTATIONS

Interactive screens offer an extremely versatile form of presentation coupled with the ability to source, from a simple touch, a vast array of digital content from speeches to pictures to videos and even live feeds. This is demonstrated by the growing number of broadcasters using interactive touchscreens and Giant iTabs live on air for their TV shows and Live broadcast or seminar presentations.

4 RETAIL, CORPORATE, GAMING AND BANKING

From boardroom pitches to customer experience centers and in-store e-commerce kiosks, Giant iTabs are able to showcase all your digital content from one single device acting as a perfect sales, presentation or collaboration tool. With their ability to reproduce exactly the same mobile or tablet experience, but on a larger scale, they are perfect for presenting games and mobile commerce solutions to customers or colleagues where the normal hand-held devices are just too small.

5 EDUCATION, HEALTH, TEACHING AND TRAINING

Schools, colleges, academies and training centers all benefit from the ability to present education and training sessions with added interaction to involve their audience and tell their stories better. With the ability to download apps from the Google Playstore, schools and education departments are able to load the Giant iTab with a while host of different teaching and training apps from 3rd party developers. Add some teaching games and you have the perfect solution to create an effective and enjoyable learning environment.

A Complete 'Plug & Play' Solution
capable of showcasing any digital
content including websites,
digital multimedia and Apps
in native or web format.

“

The touchscreen display exceeded all my expectations and has really been a true crowd-pleaser. Also, the service that the team have provided is wonderful and I've felt fully supported throughout my experience.

”

TREVOR ROALD
QuickMobile, Manager of Industry Relations

What our clients say...

“ wow ”

The Giant ITab was the perfect solution for us to showcase our new Sportsbook app.... for allowing potential customers in our target market to use and feel the product, with added 'wow'.

JENNIE PREST
William Hill,
Sponsorship Manager

“ no brainer ”

The Touch2View stand was one of the most engaging and successful at our Show, with more and more companies and events using apps, this solution is a no brainer to drive business.

SCOTT BIRCH
Mash Media, Managing Editor
Exhibition Division

“ huge advantage ”

Giant iTab has been a global success. Innovation like this is a huge advantage to marketers and event organisers who want to increase customer and visitor engagement.

JAMES MORGAN
CSEP, Founder Event Tech Lab

“ group experience ”

The multi-touch function of the Giant iTab changes the normal iPad experience from a personal device to a group experience.
